Give three observations/ suggestions to improve the overall teaching – learning experience in your college.

6 responses

some projectors in the classrooms are loose and in computer lab-3 some systems are too old , So please upgrade it.

Teacher must focus on every single individual..
 Teacher must question students during their lecture to ensure students are getting their concept or not..
 Teacher must conduct doubt session also..

- 1) repairing of instruments and computer systems.
- 2)use of modern Technology.
- 3)skill Development programs.

Again, last question has duplicate options. As for suggestions, the teaching's fine as it is, neither too pushy, neither too indifferent

Only thing is to make sure if the students are planning for mass bunk then teacher must disagree with them and take the class.

- 1. Teacher should interact with every student.
- 2. They should perform all the experiment what they teach us theoretically
- 3. Teacher is always in rush to complete the syllabus on the time that's why they teach so fastly that student doesn't get it what they are teaching , they should work on that also
